

Jaime

3 year old spayed/female, Bloodhound/Labrador Retriever Mix , (black) 80#

Jaime is excellent with dogs and is friendly to most people. On occasion she has been a bit suspicious of some men. She has been introduced to cats and is fine with cats. She likes to play fetch and tug-o-war. She loves to go for car rides and play in the garden hose and baby pool. My guess is that she would probably enjoy swimming - I just haven't had the opportunity to take her to the pond yet. She has had some obedience training and has an excellent "Recall" - especially if there is food involved! She is not good for nail trimming. I can groom her and trim her nails now, but it took some work and she needs to be very familiar with you before she is comfortable with this. She is housetrained and crate trained. She will "counter surf" for food and if she can reach it - it's up for grabs J She will also guard food if she gets it and consume it as quickly as possible. She lost approximately 100# - so she now thinks I am starving her and wants to keep anything edible for herself.

Jaime came from the Marshall County Humane Society, a kill shelter in Indiana. When I took Jaime from the shelter she weighed 179#. She was the most obese dog I had ever seen. I choose her mainly to do a "before and after" and see what this poor overweight dog would look and act like at her normal body weight. She went from only being able to walk a few steps at a time to being one of the fastest dogs I have living with me. Not all can be saved but Jaime deserved a second chance at a normal, obese free life. She is current on all of her vaccinations (Rabies, Distemper/Parvo Combo and Bordetella) and is negative for Heartworm and Lyme disease and has been on monthly parasite and flea control.

Please contact me if you think Jaime is the dog for you. 574-780-3302
